MM Karton expands raw material supply for cartonboard production

Mayr-Melnhof Karton has signed an agreement to acquire a high grade CTMP (Chemithermomechanical pulp) production near Trondheim, Norway. An annual capacity of up to 130,000 tons replaces external supply by self-sufficiency. The acquisition price will amount to approximately EUR 4 million. Södra Cell AB, Schweden, is the seller of the plant.

MM Karton is the largest producer of coated recycled cartonboard worldwide with a growing position in virgin fiber-based cartonboard.
